

Dear Environment Committee Members:

Thank you for your vote to draft legislation to create a Connecticut Clean Cars Incentive Program, and for your leadership in the effort to reduce global warming pollution.

Our state can and must take swift action to reduce the impact of global warming pollution that threatens our health, our economy, and our environment. The transportation sector is the single biggest source of Connecticut's global warming emissions. Passing legislation to provide consumers with financial incentives to purchase vehicles that are cleaner - and more efficient - is a common-sense approach that will have a real impact on our environment.

Interstate 95 cuts through the center of the boundaries of the Eastern Norwalk Neighborhood Association. As president of this group, I am particularly concerned about the threat to the health of our members. It is a dense residential neighborhood where many children and elderly reside.

There is nothing more important than protecting the health of residents and the environment in which we live.

Thank you again for your vote, and for your help to ensure that Connecticut lawmakers continue to be recognized as leaders in the battle against global warming.

Sincerely,
Laurel Lindstrom
20 Raymond Terrace
Norwalk CT 06855
